WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/KR2005/000138

Во	x No. 1 Basis of this opinion
1.	With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
	This opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
	a. type of material a sequence listing table(s) related to the sequence listing
	b. format of material in wirtten format in computer readable form c. time of filing/furnishing
	contained in the international application as filed. filed together with the international application in computer readable form. furnished subsequently to this Authority for the purposes of search.
3.	In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additioanl copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4.	Additional comments:

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/KR2005/000138

Box No. V	Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
	citations and explanations supporting such statement

1.	Statement			
	Novelty (N)	Claims	1	YES
		Claims	NONE	мо
	Inventive step (IS)	Claims	1	YES
		Claims	NONE	мо
	Industrial applicability (IA)	Claims	1 .	YES
		Claims	NONE	NO

2. Citations and explanations:

Reference is made to the following documents:

D1: JP 1104222

D2: WO 04/30277 A3

1. Novelty and Inventive Step

D1 discloses the method of shortening time from the occurrence of the state change of a management agent to detection without giving overload to a management manager and a network in a simple network management protocol(SNMP) network management system.

D2 relates to A method of monitoring the status of one or more network elements linked together in a telecommunication network, comprising receiving a down status notification from a NE in the network, identifying one or more other NEs which are linked to the NE, polling the or each other NE to determine the status thereof

Although these two documents relate to the network management system based on SNMP, None of these documents reveals the idea of correcting time aberration in polling-based network management system.

Moreover, It seems not obvious to derive the said idea from the said two documents

Therefore, novelty can be acknowledged for claim 1, also these claims involve an inventive steps.

2. Industrial Applicability

Claim 1 meet the criteria set out in PCT Article 33(4).
